

TO NOVAPOINT IDS USERS

To log in to your Novapoint Infrastructure Design Suite today, you use Vianova ID.

Novapoint 21 will be released on Wednesday May 9. Vianova ID is not compatible with Novapoint 21 - in order to log in and use the new version of Novapoint you need to have a Trimble ID.

Please note that for Novapoint 20 and previous versions of Novapoint, Vianova ID is still, and will remain, the authentication for your license. Trimble ID is the licence authentication for Novapoint 21.

You can easily migrate your Vianova ID to Trimble ID:

How to migrate?

First you need to create a username and password for your Trimble ID. If you don't have a Trimble ID already, you can create one here:

[Create your Trimble ID](#)

Trimble

Enter the above text

Create new account

Go back

Link my Vianova ID

After you have created a Trimble ID account, you will receive an e-mail to verify your Trimble ID.

Next step is to map the Trimble ID with your Vianova ID here and confirm your ID:

[Link to my Vianova ID](#)

Please fill out your Vianova ID

piedho

.....

➔ Link my Vianova ID

Reset your password »

Note: After you have migrated your Vianova ID to Trimble ID, you still need to use your Vianova ID when you work with models and projects that are designed in Novapoint 20 and previous Novapoint versions. If you work in Novapoint IDS and are involved in projects across Novapoint Versions, e.g. one that is designed in Novapoint 20 and one that is designed in Novapoint 21, you have to use Vianova ID and Trimble ID as your licence authentication respectively.
